

ACE CRYSTAL EASY 50

AM ACE PEDESTALS

Highly efficient AM (Acousto-Magnetic) system designed to operate as a powerful and reliable single pedestal with up to two additional receivers. The AM ACE system is a perfect solution for cash desks or standard entrances, and the clear acrylic panel allows it to blend seamlessly into modern or premium retail spaces, the ideal fusion of function and design.

A fully equipped security solution includes integrated visitor counting and directional alarms. It can also be connected to the StoreMonitor cloud or upgraded with wireless communication for easy data collection and maximum security.

STOREMONITOR COMPATIBLE 

Features & options:

- Remote maintenance and diagnostics
- Wireless communication
- StoreMonitor connectivity
- Visitor counting
- Smart directional alarms
- RGB Decoration light
- Power saving mode
- Additional alarm outputs
- Jammer detector
- Tag too close indication

Integrated smart visitor counting and data collection through our StoreMonitor cloud application will provide you with essential data you need, not only to monitor the system functionality and status, but to provide valuable insights into your store performance and sales efficiency.

Remote connectivity with our eComm module ensures that our systems are not only easy to install but can also be serviced and maintained remotely with fast response and without unnecessary travel costs.

On top of remote connectivity our ACE system now features **wireless in-store communication** which makes the installation and maintenance of the system very flexible and cost effective. Setting up and adjusting our system has never been easier or faster.

The **premium crystal acrylic** panel is manufactured from the highest grade, preventing discoloration and warping. The included multi-colored LED lights can be configured to not only display the alarm colour that you wish, but also to light the antenna permanently in an attractive glow.
