

AM ACE CLASSIC 30, AM ACE CLASSIC 30X AM ACE CLASSIC ADVERT

AM ACE PEDESTALS

Full-featured, powerful AM (Acousto-Magnetic) ACE system is focused on strong detection of adhesive labels, reliability, and flexibility. It was designed to operate as one or several pedestals solution. The NG (Next Generation) product line is suitable for any environment, with a performance that ranks at the top of the retail security market.

The AM ACE CLASSIC pedestals prove that an economical solution does not mean sacrificing performance or quality. The slim and space-saving design is ideal for stores that require only tag detection, without additional integrated features.

The CLASSIC 30 can be used as an advertising panel, or it can be installed as a transparent pedestal (CLASSIC 30X). It can also be connected to the StoreMonitor cloud for advanced system analytics and store performance reports.

In addition to these powerful features our systems are  **ECO MODE** enabled. This power-saving tool helps you minimize electricity consumption which increases the lifespan of the system, saves costs, and is environmentally friendly.

STOREMONITOR COMPATIBLE 

Features & options:

- Remote maintenance and diagnostics
- StoreMonitor connectivity
- Metal detection
- Advertisement panel
- Additional alarm outputs
- Jammer detector
- Tag too close indication
- Decoration light
-  **ECO MODE** enabled systems

An **advertisement** panel on your security system can be an additional sales tool with our “easy slide” access to printed banner replacement. An identical pedestal but without the opaque panel, the Classic X pedestal features a transparent acrylic surface that blends in with the surrounding space.

Our Classic line of pedestals are available in three standard colours (silver, black and white) as well as three stylish options. The standard Classic pedestal is a lightweight, fully closed pedestal with opaque panels in one of our standard colour. The second option is transparent design with acrylic panels added to protect crossbars from possible damage at high traffic places. The third one is the AM Classic 30 Advert.

For retailers facing losses due to professional shoplifters equipped with foil-lined bags, the classic pedestal line can be upgraded with our integrated NG METAL SPY, providing the maximum protection that you can expect from an article surveillance system.

When connected to our Storemonitor cloud analytics all essential data from visitor counters, alarm management and system operation are available for further processing. You can evaluate your store or system performance in advanced graphs and overviews or set up reports to be automatically sent to your mailbox or uploaded to your existing system.
