AM ACE PEDESTALS

Full-featured, powerful AM (Acousto-Magnetic) ACE system is focused on strong detection of adhesive labels, reliability, and flexibility. It was designed to operate as one or several pedestals solution.

The new AM ACE system is suitable for any environment, with a performance that ranks at the top of the retail security market.

The AM ACE PROFI supports remote connectivity and data collection and can also be connected to the StoreMonitor cloud for advanced system analytics and store performance reports.

In addition to these powerful features our systems are  **ECO** MODE enabled. This power-saving tool helps you minimize electricity consumption which increases the lifespan of the system, saves costs, and is environmentally friendly.

STOREMONITOR COMPATIBLE 

Features & options:

- Remote maintenance and diagnostics
- StoreMonitor connectivity
- MetalMagnet detection
- Visitor counting
- Advertisement panel
- Additional alarm outputs
- Smart directional alarms
- Jammer detector
- Tag too close indication
- Integrated doorbell
-  **ECO** MODE enabled systems

RFID COMPATIBLE 

Remote connectivity and data collection are standard inbuilt features of the AM ACE systems. It ensures that our systems are not only easy to install but can also be serviced and maintained remotely with fast response and without unnecessary travel costs.

Retailers facing losses due to professional shoplifters equipped with foil-lined bags, can upgrade their AM ACE systems with the license-based Metal and magnet detection feature that is easily available for extra security.

An **advertisement** panel on your security system can be an additional sales tool with our "easy slide" access to printed banner replacement. An identical pedestal but without the opaque panel, the Profi X pedestal features a transparent acrylic surface that blends in with the surrounding space.

When connected to our Storemonitor cloud analytics all essential data from visitor counters, alarm management and system operation are available for further processing. You can evaluate your store or system performance in advanced graphs and overviews or set up reports to be automatically sent to your mailbox or uploaded to your existing system.
